

MIXER – MXA020

Mixer is designed for homogenizing samples of dry powder materials. It consists of a robust metal cylindrical vessel, a motor with a gearbox and pneumatically operated drain hole in the bottom of the mixer.

Feeding into the mixer is carried out through the hole in the top of the mixer. Mixer is suitable for sampling systems with manual or automatic control.

TECHNICAL DATA

Material of sample	powder material, non-sticky
granularity	max. 1mm
maximal temperature	150°C
Mixer content	3.0 / 2.0 l (total / working)
Sample input	tube DN60
Sample output	tube DN50
Power supply	3 x 400V, 0.12kW
Compressed air	0.4 – 0.6MPa, dry, oil-free
Mixer speed	12 rpm
Weight	ca 8kg
